

Standup - Alicia Clark

Objective: understanding the effects of the slave trade on ship travel

- Progress:
 - Created functions to import the data, group the data by language, and count words in each logbook entry
 - Explored packages such as pandas, matplotlib basemap, scikit-learn
- Deliverables:
 - Plot paths of ships that mention slaves using matplotlib basemap
- Challenges:
 - Data sets are in different languages
 - Team members are not available much of this week
